SKILLS

Java | JavaScript | TypeScript | SQL | Selenium | Cypress | Playwright | REST Assured | Postman | Swagger | JMeter | MongoDB | MySQL | PostgreSQL | Redshift | RabbitMQ | Azure DevOps | Azure Blob Storage | GitLab CI/CD | Jenkins | Docker | Grafana | Sentry | BrowserStack | Git / GitHub | Jira / Confluence | Trello

AI TOOLS

Claude / Claude Code | Gemini | ChatGPT | GitHub Copilot | Prompt Engineering | AI-assisted QA & test design

LANGUAGES

English	Fluent
Serbian	Native
Spanish	Basic

COURSES

Software QA Engineer
IT Bootcamp Serbia — 10/2021

Profile

Full Stack QA Engineer with 5+ years of experience in manual and automated testing of web, mobile, and API-based applications. Skilled in end-to-end API workflows, integrations, UI testing, and data consistency across connected services. Builds and maintains automated tests with Java, JavaScript, TypeScript, Selenium, Cypress, Playwright, REST Assured, JUnit, and TestNG. Applies Claude and Gemini to support test design and result analysis, always validating AI outputs against real system behavior.

Experience

Full Stack QA Engineer — Trip-arc

Travel & Hospitality | 04/2025 – Present

- Identified a gradual performance regression by running consistent load tests and comparing results across runs, helping the team isolate the root cause faster.
- Restored outdated Postman smoke and regression suites, fixing payloads, scripts, and environment-variable handling across UAT, PreProd, and PROD.
- Migrated critical UI and end-to-end flows into Playwright, and introduced an AI-assisted QA workflow for tracking and reporting test results.
- Validated data consistency across UI, APIs, and MongoDB, and used Claude Code to speed up project exploration and defect investigation.

Postman, TypeScript, MongoDB, Azure DevOps, Playwright, Azure Blob Storage

Full Stack QA Engineer — FinTech Project

FinTech | 11/2023 – 04/2025

- Developed automated API and UI tests in Java and Selenium to catch defects immediately after code changes, reducing repetitive manual testing.
- Validated transaction data integrity across Redshift and MySQL using SQL queries, and reviewed Grafana/Sentry dashboards to investigate failures and support root-cause resolution.
- Applied AI tools to organize and compare test results across stages, accelerating reporting while validating outputs against source data.
- Ran cross-browser/cross-platform testing with BrowserStack and scheduled automated regression through Bitbucket Pipelines.

Postman, Java, SQL, Selenium, REST Assured, MySQL, Redshift, Bitbucket Pipelines, Grafana, Sentry, BrowserStack

Full Stack QA Engineer — Polovni Automobili

E-Commerce / Automotive | 10/2022 – 11/2023

- Built and maintained automated API and UI test coverage with Java/Selenium, Playwright, and Cypress, enabling faster defect detection after application changes.
- Reduced repetitive manual regression effort, freeing the QA team to focus on edge cases and complex user scenarios.
- Validated data consistency across UI, services, RabbitMQ messages, MySQL, and MongoDB, and ran performance/load testing with Postman and JMeter.
- Scheduled automated regression suites through GitLab CI/CD and Jenkins, supporting release-readiness decisions.

Postman, Swagger, Java, TypeScript, Selenium, Playwright, Cypress, MongoDB, MySQL, RabbitMQ, Docker, GitLab CI/CD, Jenkins, JMeter

Manual QA Engineer — FinTech / Logistics Project

Super-app (Ride-hailing, Delivery, Money Transfer) | 04/2021 – 10/2022

- Created and maintained test documentation, including test plans, test cases, and detailed test steps based on product requirements and user stories.
- Executed test cases through manual functional, regression, and exploratory testing, and retested resolved issues to confirm fixes before each release.
- Wrote clear bug reports with steps to reproduce, expected and actual results, screenshots, and environment details, and followed each defect through to resolution.
- Tested web and mobile applications across different browsers, operating systems, and screen sizes, using both BrowserStack and real iOS and Android devices.
- Performed A/B testing, verifying that each variant behaved and displayed correctly for its target user group.
- Managed tasks and test progress in Jira and Trello, working closely with developers and product owners to clarify requirements and prioritize issues.

Manual Testing, Test Documentation, Mobile Testing (iOS / Android), BrowserStack, A/B Testing, Jira, Trello
